

eCASES™ - Enterprise Child Support Enforcement Suite

Informatix introduces eCASES™ a browser-based modular enterprise suite of Child Support Enforcement Tools in a scalable software package. eCASES™ is a highly-configurable flexible system designed to be deployed with only features and functions your organization needs. eCASES™ - a CSE tool designed by CSE professionals for CSE professionals.

Case Management

Proactive case management utilizes automated events and user alerts. Best practice work flows ensure timely and accurate case management.

Collections and Distribution

Receipting of payments with complete audit trails, follows GAAP; batch or real-time distribution of payments to specific obligations.

Document Generation

Flexible document creation service; incorporates document generation in multiple formats including MS Word, Adobe, etc.

Platform Independent

eCASES™ is platform independent utilizing Java & JavaEE.

Scalable Architecture

eCASES™ is highly-scalable meeting your needs, regardless of the size of your user base or case load.

Interoperability

eCASES™ can be integrated or interfaced with existing systems. Legacy non-relational databases such as IDMS, Adabas, etc. can be accessed using middleware.

Flexible Security

eCASES™ provides robust-standalone security or can be integrated with existing security systems using pluggable authorization.

Database Independent

eCASES™ operates with relational database management systems: Oracle, DB2, MS SQL Server

Multi-tiered

eCASES™ Modular design provides tier independence from software, hardware, platform and technology changes. The web-enabled application provides flexible deployment options and efficient scaling.

High Availability

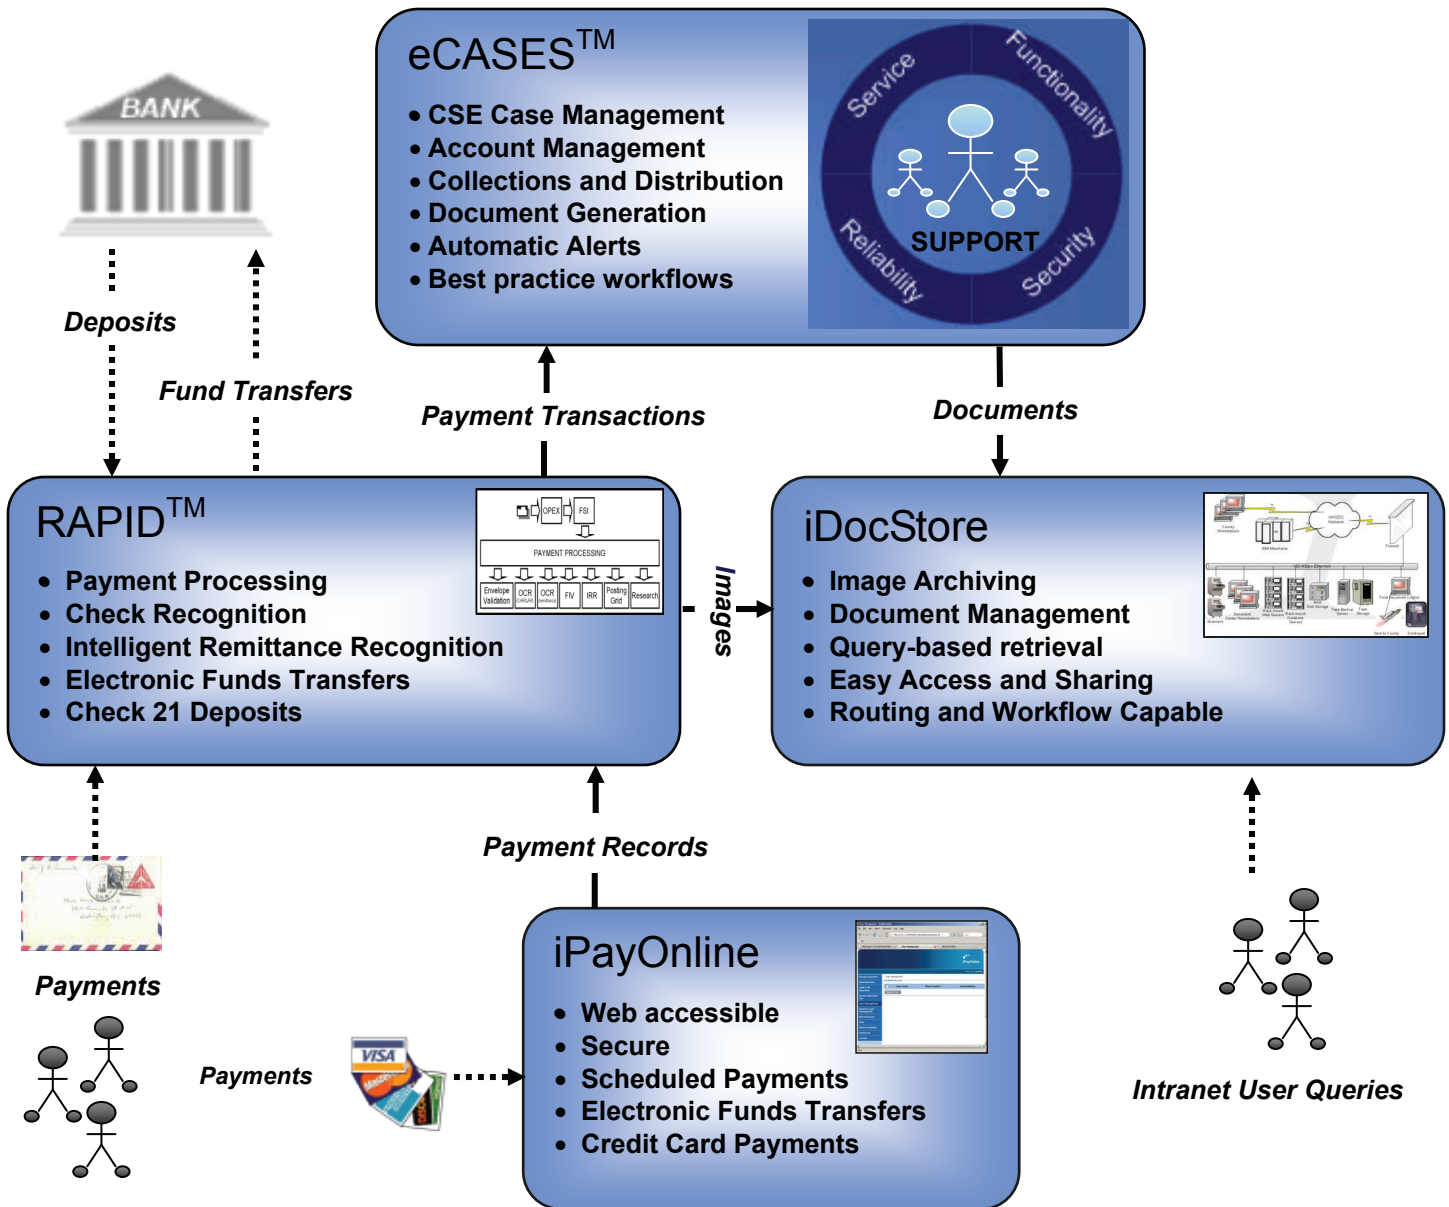

eCASES™ has system redundancy, failsafe transactions, consistent throughput and failover processes.
